FRONT of Boxed Danhild VARIO

Prerequisites needed:

- 1) Screw machine
- 2) Cross screw bit
- 3) Torx Bit
- 4) Blankets
- 5) One person to help

Nice to have:

One pallet

Unscrew Top
(all screws)

Unscrew front plate
(bottom and both sides)

You do not need to
unscrew Top screws
for front plate

Lift off front plate

Unscrew screws from rear plate
(you only need to unscrew screws in left side all way up)

Let your helper hold and support
the two side pieces

Unscrew left side piece from bottom plate
Let your helper hold and support
the side piece

Take off the blue strap

Take off tape
and remove the
organ bench

Prepare to remove the rear plate

Unscrew the rear plate
(you do not need to unscrew the top screws)

Unscrew the right side piece

The organ and pedal keyboard
are now left

Remove Pedal keyboard
Be careful when you slide it out
not to scratch....
(put a blanket in front)

Unscrew and remove the
supporter plate

Unscrew and remove
the wood blocks

Place a pallet
to the left side
as
shown on the above picture

Prepare tilting the organ

Tilt the organ

Put down the organ
to horizontal position

Do **NOT** lift under the keyboards !!!

Always beware:
Do **NOT** lift under the keyboards
when moving the organ !!

Place the pedal keyboard
under the organ console
(see further instruction in User Manual)

Place Organ bench

Connect the power for the organ bench
to the power outlet in the right side of the
organ console
